

TROPICAL CYCLONE ADVISORY NO. 3A
Super Typhoon "HINNAMNOR"

Issued at 5:00 PM, 30 August 2022
 Valid for broadcast until the next advisory at 11:00 PM today

"HINNAMNOR" RAPIDLY INTENSIFIES INTO SUPER TYPHOON							
Location of Center (4:00 PM)							
The center of the eye of Super Typhoon "HINNAMNOR" was estimated based on all available data at 1,485 km East Northeast of Extreme Northern Luzon (26.7°N, 134.9°E)							
Intensity							
Maximum sustained winds of 185 km/h near the center, gustiness of up to 230 km/h , and central pressure of 935 hPa							
Present Movement							
Westward at 30 km/h							
Extent of Tropical Cyclone Winds							
Strong to typhoon-force winds extend outwards up to 320 km from the center

TROPICAL CYCLONE ADVISORY NO. 3A

Super Typhoon "HINNAMNOR"

Issued at 5:00 PM, 30 August 2022

Valid for broadcast until the next advisory at 11:00 PM today

GENERAL OUTLOOK FOR THE FORECAST PERIOD

- Super Typhoon "HINNAMNOR" will move generally westward today over the sea south of Japan, then turn west-southwestward tomorrow (31 August) while decelerating over the sea southeast of the Ryukyu Islands. On the track forecast, "HINNAMNOR" may enter the PAR region tomorrow evening. Once inside the PAR, the domestic name "HENRY" will be assigned to this tropical cyclone. Further deceleration is forecast to occur as it turns more southwestward over the northern Philippine Sea. By Friday (2 September) through Saturday (3 September), "HINNAMNOR" may become almost stationary.
- "HINNAMNOR" intensified into Super Typhoon at 2:00 PM today. This tropical cyclone may continue to intensify over the sea south of Japan and may reach a peak intensity of 195 km/h.
- The extent of tropical cyclone winds of "HINNAMNOR" may continue to expand in the coming days as it moves towards the northern Philippine Sea. As such, the possibility of hoisting a Tropical Cyclone Wind Signal over Extreme Northern Luzon during the occurrence of this tropical cyclone within the PAR region is not ruled out.
- This tropical cyclone may bring rough seas over the northern and eastern seaboard of Luzon beginning late Thursday (1 September) or early Friday. Such condition may be risky for those using small seacrafts. Mariners are advised to continue monitoring for updates.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to continue monitoring for updates related to this tropical cyclone.

Unless an intermediate advisory or initial tropical cyclone bulletin is released, the next tropical cyclone advisory will be issued at 11:00 PM today.
